Forecast for Thursday 25 Nov 2021

Weather: Occasional snow or hail showers expected through the day across the Cairngorms. Elsewhere a lot of dry weather expected. Best of the sunshine will be in the morning, high cloud will spill across by afternoon. Outbreaks of snow will spread from the west through the evening, although snow increasingly confined to 900 metres late evening as it turns to rain at lower elevations. Risk of blizzard conditions developing on the highest tops.

Chance of cloud free mountain/hill tops above 800m: 80%

Visibility: Generally very good with good air clarity. Some patchy cloud down to 750 metres in snow showers, when visibility will briefly drop. Becoming poor in evening snow as low cloud becomes more extensive down to 600 metres.

Met Office Aberdeen Meteorologist's View

Strong winds and cold air will lead to a risk of severe wind chill at higher elevations. Hazardous conditions setting in after dark with summit gales, snow, rain and low cloud spreading from the west.

Forecast for Friday 26 Nov 2021

Weather: Cloudy with rain, and higher summit snow, in the early hours. Then sunny periods and snow showers in the morning. Clouding over the risk of some persistent and heavy snow as the afternoon progresses, this may set in for the rest of the day across Lochaber and Argyll. Blizzards developing with gale or severe gale force northerly winds setting in by evening leading to some treacherous conditions in the north. Feeling bitterly cold.

Maximum wind: Northwesterly winds gusting 50 to 60 mph, may as high as 70 to 80 mph after dark on the highest tops in the north.

Chance of cloud free mountain/hill tops above 800m: 60%, low cloud may become more prevalent later in the day.

Visibility: Very good outside of cloud and showers, but becoming poor in any snow and low cloud through the afternoon and evening. Cloud lowering to 500 to 700 metres in heavier wintry showers, and more widely later.

Temperature: **Glens:** Zero Celsius rising to 4 Celsius
At 800m: Around minus 2 Celsius
Freezing level: Above summits in the early hours, then lowering to 400 metres, and rising to 600 metres later
